

Your B-Smart product is supplied with 1, 2 or 4 strips of industrial strength double faced tape for secure fastening to the wall without the use of tools.

1. Ensure that the wall surface is clean, dry and free of any soap film. To remove soap film, wipe clean with rubbing alcohol and let dry.
2. For easy installation, do not remove the mounting plate from the product. Ensure mounting plate on back of product is clean so that the tape adheres properly.
3. Apply tape strips directly over tape line on the back mounting plate as per illustration.
4. Press and hold tape in place for 5 seconds to ensure a strong bond.
5. Determine the exact position on the wall for your product, remove protective backing from the tape and apply product to the wall.
6. Press and hold the unit in place for 5 seconds to ensure a strong bond.
7. Allow at least 12 hours for the adhesive to cure, prior to using.
8. For cleaning, simply slide the product off the mounting plate by pushing up with slight pressure. Clean with non-abrasive soapy water and rinse. Wipe dry and re-apply to mounting plate.
